Differences

2 The difference between us and others

1 platform

1. The surface layer of the platform is environmentally friendly PU leather with a thickness of 0.8MM, which reflects the leather texture and highlights the grade of the site
2. The bottom is fixed and installed by special fasteners, the platform does not flip and does not warp
3. The bottom layer of the platform is made of PVC warp and weft woven leather instead of cheap and easy-to-break red interlining

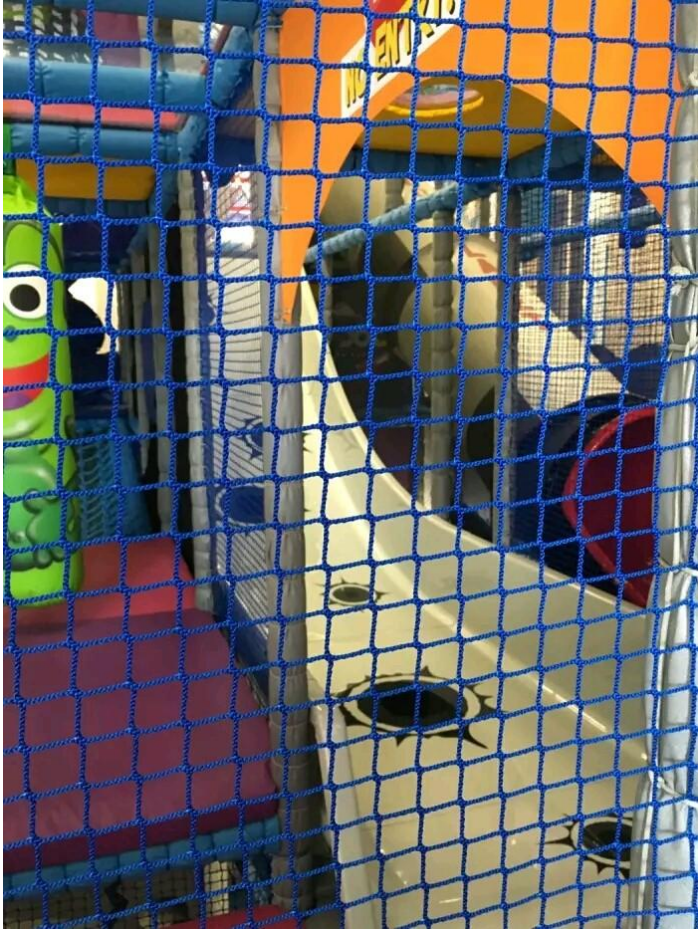

1 platform

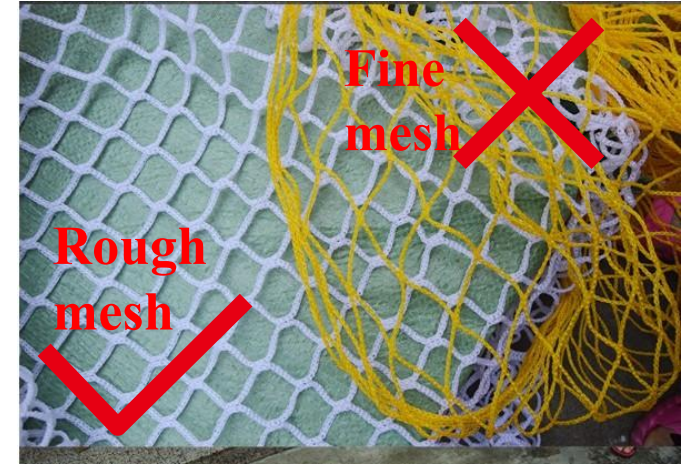

1. The interior is a solid multi-layer board with a thickness of more than 1.5CM
2. The thickness of pearl cotton is 3CM, and the total thickness of the platform is more than 4.5CM
3. Adhere to the use of high-quality solid wood multi-layer boards, there is no void in the middle, and each layer of boards is tightly fitted without gaps

2 Protective Net

1. The Rough mesh rope is 3.5MM thick, composed of seven strands, and the mesh is 3.5CM
2. Fine mesh rope is 3MM thick and consists of five strands.
The mesh is 5.5CM

3 decorative plaques

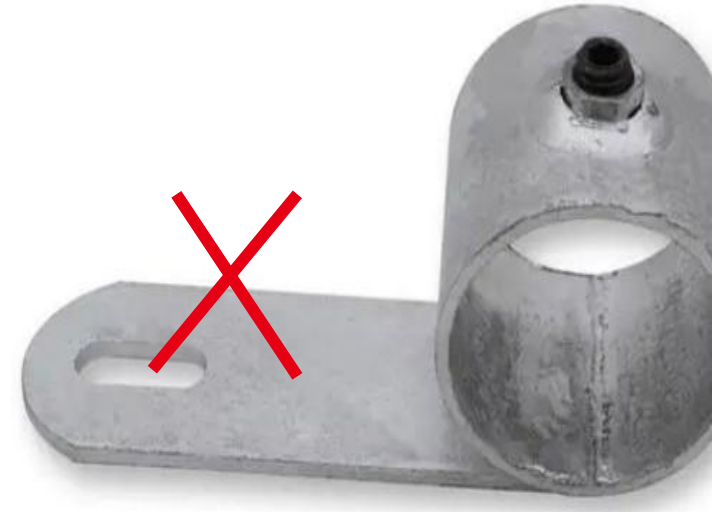

1. The doors and windows are three-dimensional, lines, and dots are all three-dimensional on the decorative sign, and the hollowed out parts are all partitioned by PVC transparent film, which is safer and more beautiful

4 Fastener

Install ear fasteners, coat with a layer of PVC leather, In this way, the ear part of the fastener will not be exposed, which is safer and more beautiful.

5 drill mesh tunnel

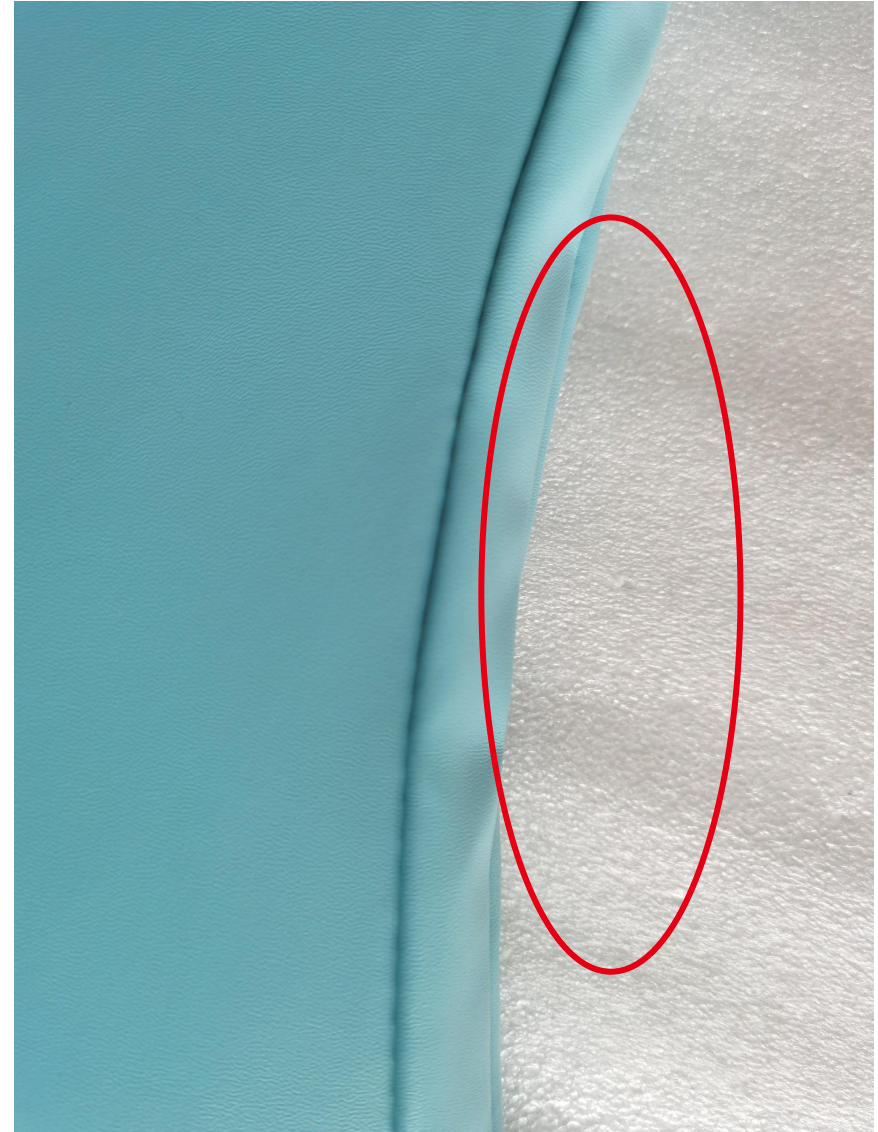

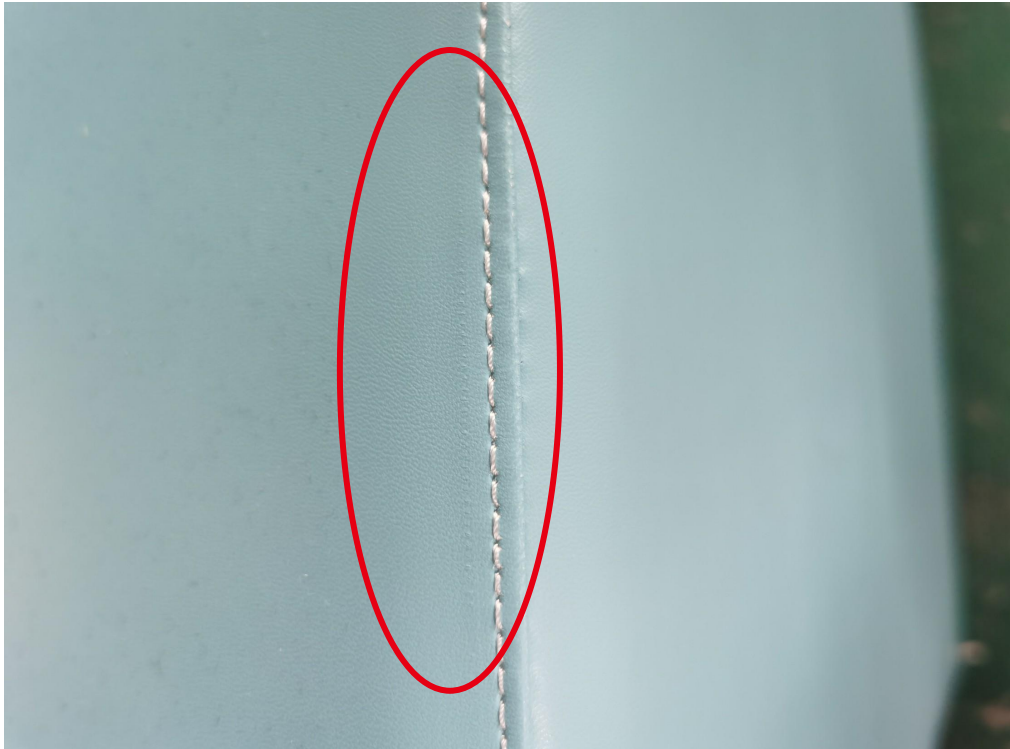

Ordinary rope,
exposed steel
frame

wire rope weaving,
Iron frame nylon cotton cord
winding

6 Sewing edge

The stitching is double-pressed to make the leather case smoother and tighter

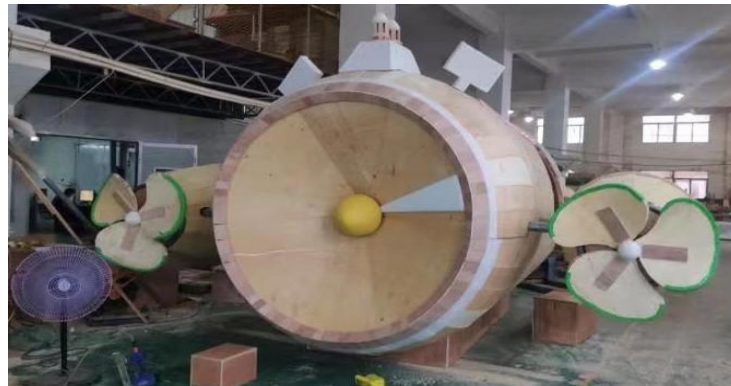

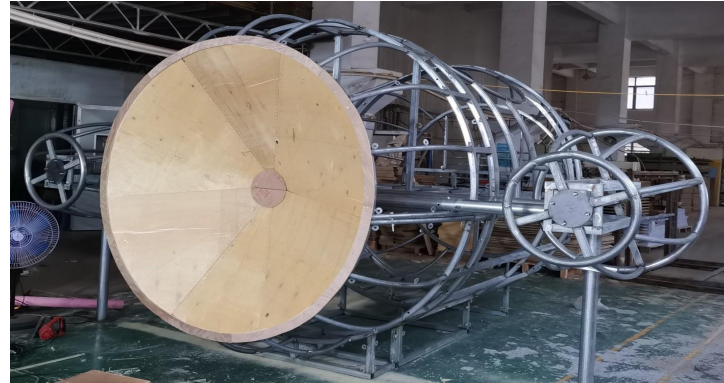

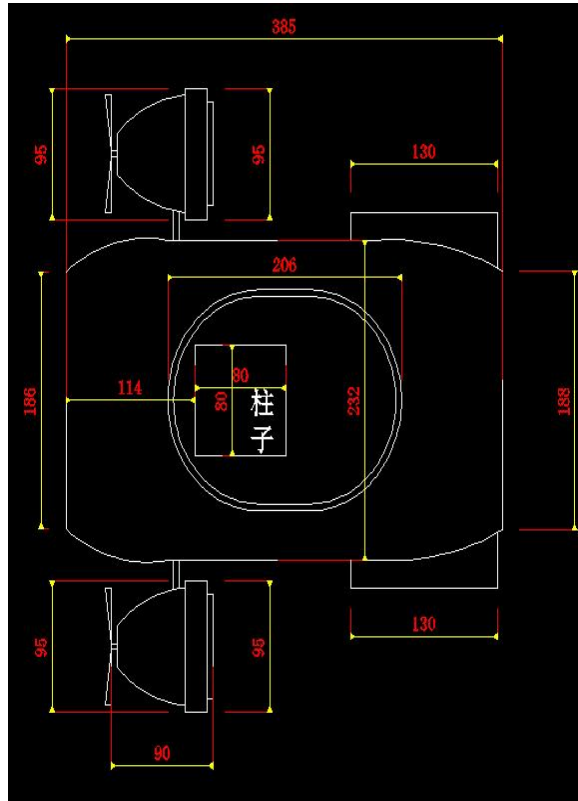

7 Internal Structure

Determine the internal size and structure based on the size and functionality of the project,
Using 40 * 40 * 2.5MM square tubes to build the internal structure, supporting the entire shape, making it more sturdy and safe.

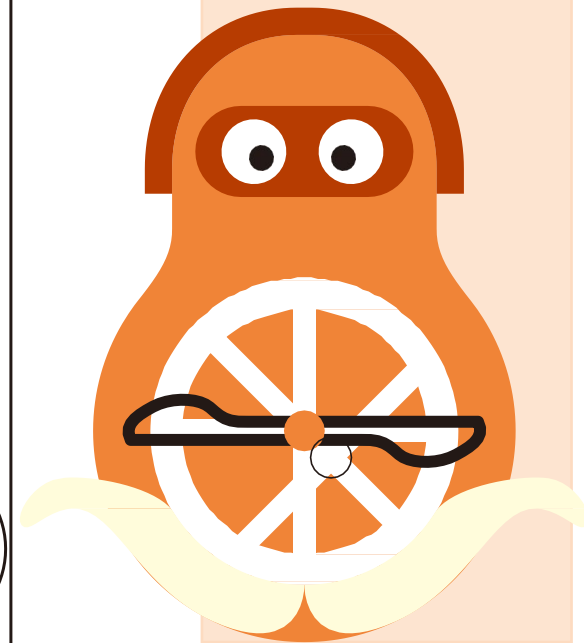

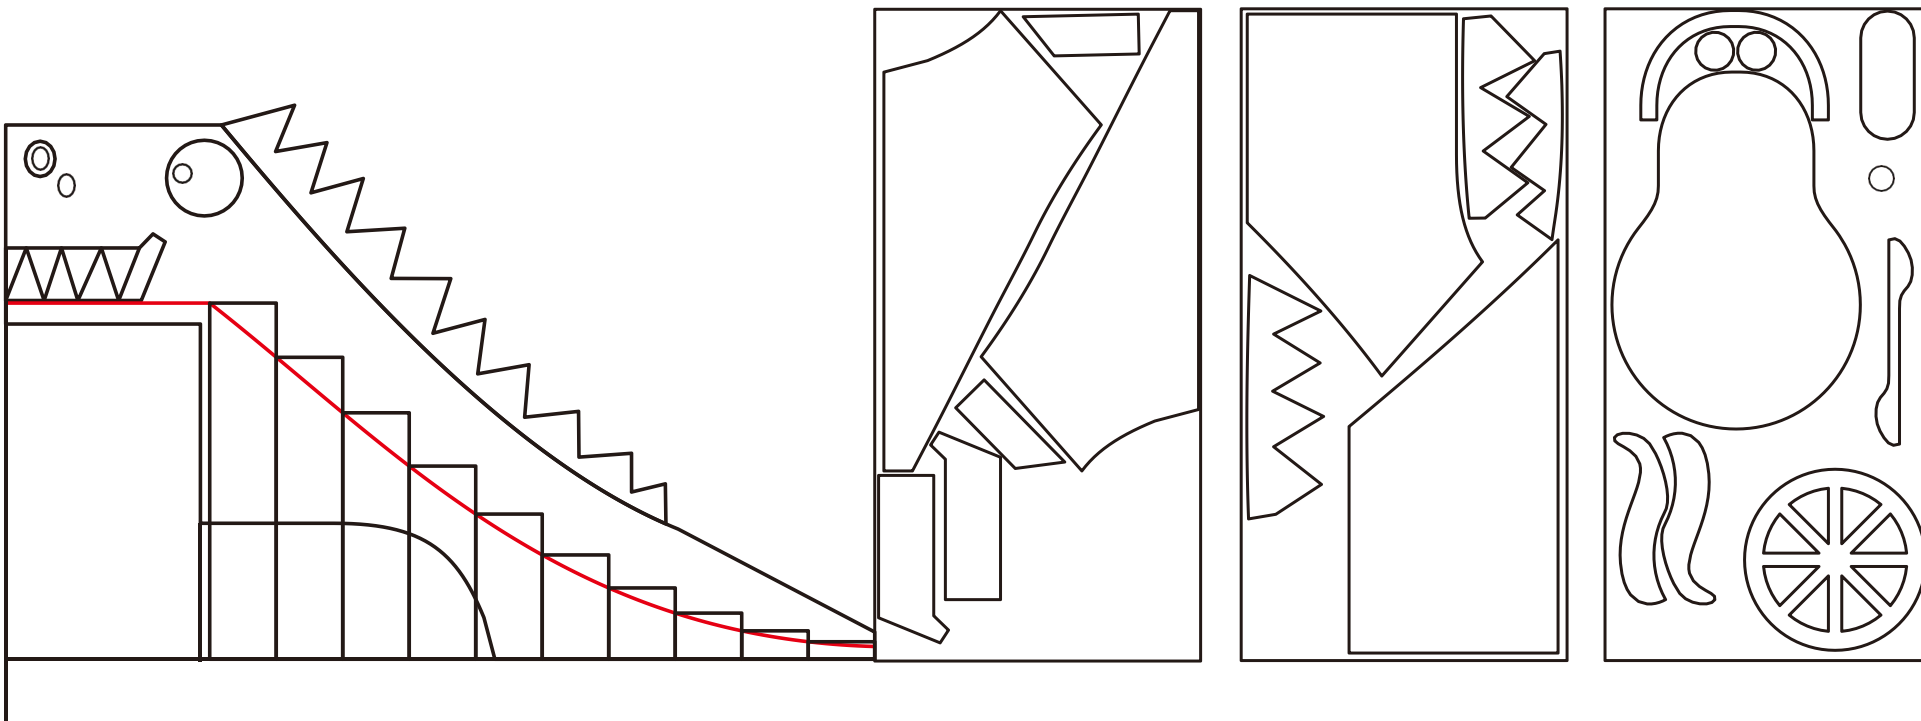

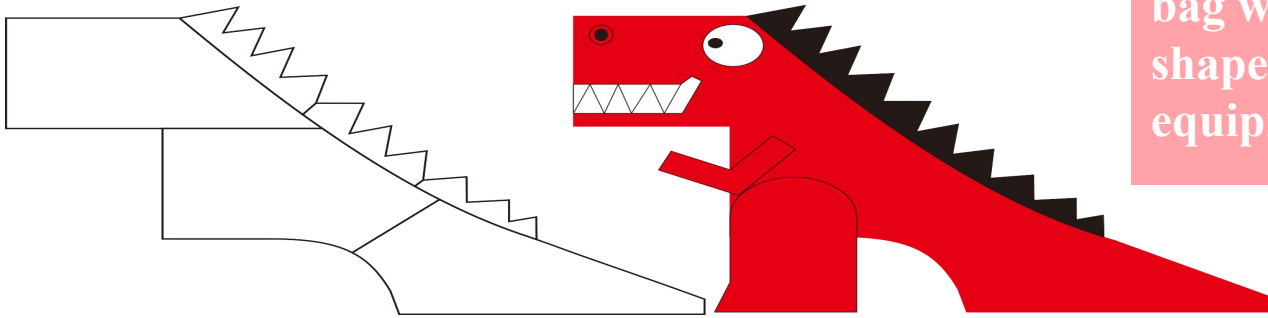

8 Technical Support

A project is broken down into a detailed engineering breakdown diagram, and the workshop produces based on the breakdown diagram, Ensures consistency between physical restoration and renderings of individual items

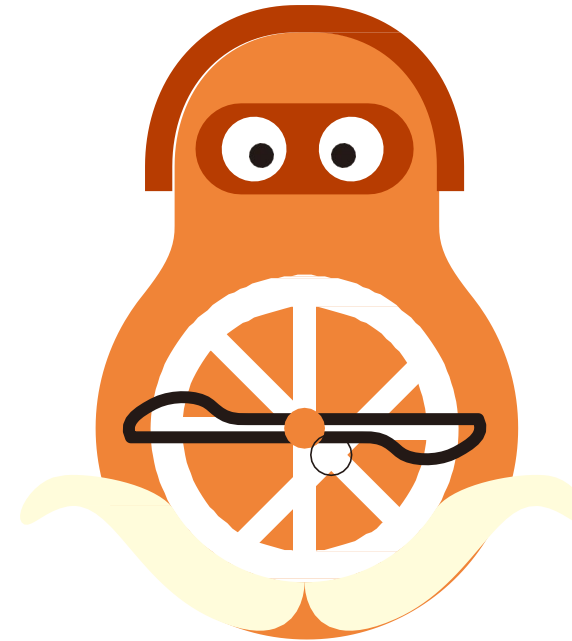

9 Computer Operation

All cartoon shapes are split by computers, designed and carved files, and the templates are carved and then handed over to the soft bag workshop for processing, making the shapes more cute and greatly improving the equipment's fidelity

10 Pipe Material

Galvanized pipe material

11 Light Effect

The entire equipment will add lighting effects on necessary individual items, such as horse spinning, stage, and simulation role-playing areas.
